

Terms & Conditions

Please Read The Following Terms & Conditions Carefully!

Assets and Communication between the client and Piratechs is to remain confidential and must not be shared! The initial payment due at the beginning of the development process is the value of your PRICING TOTAL divided by half. Essentially, whatever the total price is for your website, you just need to pay half of that cost up front!

Paying the first half of your payment will help us at Piratechs gather together all the materials we will need to make your website, such as assets, images, graphics, designs, icons, etc. Also it will help us to go ahead and get your domain name registered and provide you with a development link so you can see your website being built.

The remaining balance is due at the end of the development period, only when the website is fully functional, mobile responsive, and correctly deployed to a live online server where users can begin visiting and interacting with the site.

The initial payment or up front cost is only the first half of your total balance. For example: If your PRICING TOTAL is \$500, you only need to pay \$250 up front. Now your remaining balance is \$250.

IMPORTANT: However, the remaining balance left over IS SUBJECT to change! The remaining balance will only increase depending on what BONUS additions and changes are requested to be made to the site which were outside of the original scope.

Finally, Piratechs is not responsible for any other developers going into the website and making changes, hire other developers at your own risk.

Piratechs is also not responsible for fixing any errors or breaks caused by outside developers or the client making changes themselves, so be careful what changes you make to your own website! If it's advanced, ask us for help!
