What I Need From You

Things I Will Need You To Provide Before I Begin Working

Before the development can begin, Piratechs MUST recieve a signed & approved contract agreement form as well as the initial payment in the form of a payment invoice which will be emailed to you once the signed proposal has been submitted! There is also a <u>mandatory</u> 1 hour meeting between our Piratechs Designer // Developer (either over zoom or a phone call) and you, the client.

During this call, we will further discuss, in detail, what features & functionality you would like to have on your site, the assets you may already have (such as, if you already have a company name, logo, posts, products, or a live website with hosting already up. Don't worry if you do not have any of these as we can create these assets for your brand during the development process), and finally during the call we will discuss your future business goals and vision of what you would like to accomplish.

Besides that, please also fill in the following fields so we can further grasp what design and aesthetic you are looking for!

The Link or URL of a Website that you like:

_____

The Link or URL of a Website that you do NOT like:

_____

The Link or URL of one of your competitors websites: (so I can make you a better one)

_____
