What You Get From Me

As soon as we recieve your signed contract and intial payment, your website design and development will immediately begin. If you do not have a current company name, logo, or registered domain, that is where we would begin! We would work on getting you a company name, and registered domain that matches your brand. Next we would work on getting you a logo and color scheme. Once these are out of the way, we can begin the development process.

The development process of your website will be a period of approximately 1 months time. During this time, you will recieve a link which you can click whenever you would like to view the development and changes being made to your website. Our designers are proficient in graphics as well as photo/video/animation editing and manipulation to provide you with the highest quality assets to represent your business.

Communication is also key in how we operate at Piratechs! During the development process, if you ever have a request or change or even a tiny question, you can contact us! We are open to email and text communications to provide tracking details, however, if a call is needed, that can be facilitated as well. You can rest easy knowing that any change you would like to have made will be properly logged and taken care of in an apporopriate time and fashion.

At the end of the 1 month period, You will recieve a beautiful website as well as a login and password credentials to log in and make your own changes! It will become YOUR website so feel free to do what you want! And don't worry, even after your website is complete, Piratechs will run routine maintenance and checkups on your website EVERY week to ensure quality and functionality as well as any advanced changes you may have moving forward.
